

A force of
Nature for your
scalp and hair.

 **INA**[®]

A fusion of botanicals and beauty.

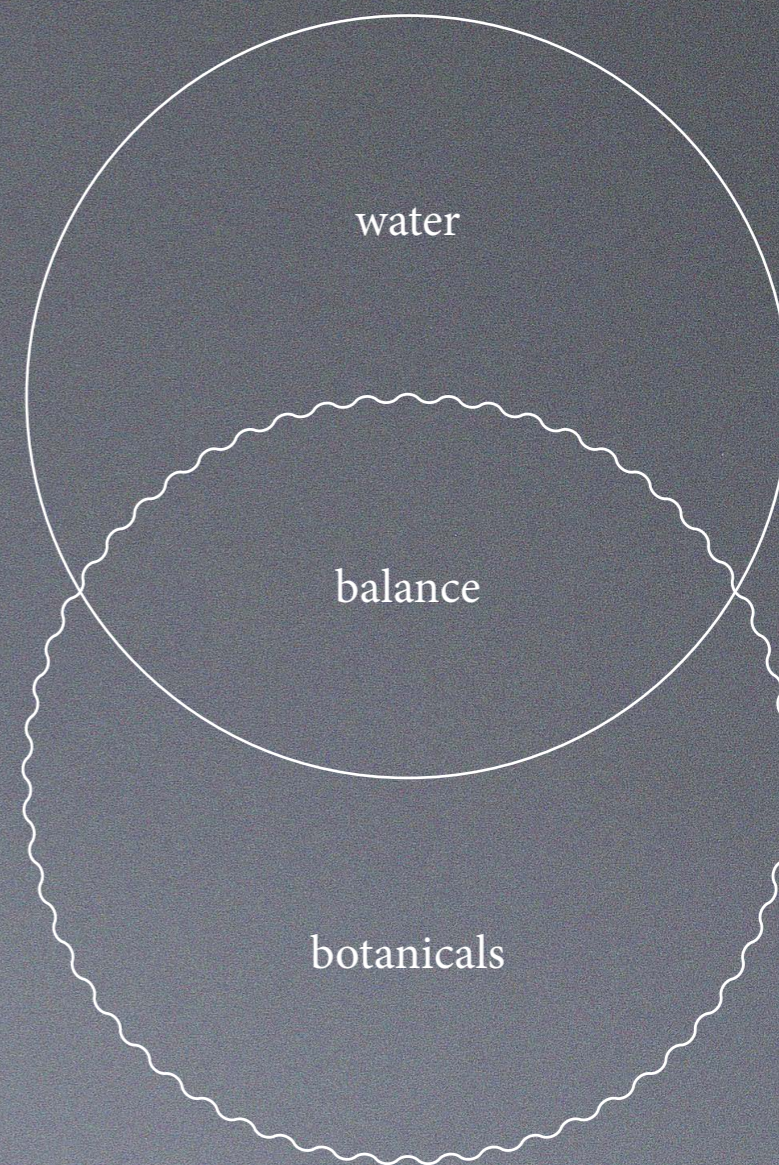

UNA was created to preserve and enhance the natural beauty of hair through unique formulas enriched with botanical extracts and active ingredients derived from medicinal waters. UNA is water—the natural element that gives life. It is Nature — a source of balance and well-being. Each product is the result of careful research aimed at restoring the hair's hydrolipidic balance, often disrupted by external factors, heat tools, and aggressive treatments. UNA's purifying, conditioning, treating, and styling solutions deliver hydrating and protective ingredients, bringing vitality, health, and shine back to the hair.

UNA is the perfect harmony of nature and science—for strong, vibrant hair full of authentic beauty.

A synergy of botanical extracts and professional results.

Every UNA product holds an extraordinary concentration of nature. Each formula stands out for its exceptional richness in botanical extracts and elements drawn from medicinal waters, carefully selected to restore vitality and well-being to the hair. UNA is one of the very few haircare lines in the world to boast such long and valuable INCI lists — a true reflection of the complexity and purity of its compositions. Every ingredient serves a specific purpose: to purify, nourish, hydrate or regenerate. This abundance of natural active ingredients turns every application into a sensorial and high-performance experience, bringing hair back to its natural strength, shine and harmony.

A precious blend of botanical waters.

At the heart of the UNA line lies a true treasure: **botanical waters, herbal macerates and medicinal waters** that capture the vital power of plants. These waters are more than just a base — they're active functional ingredients, extracted through three complementary methods:

- **Hydrophilic (steam distillation):** draws out sugars, minerals and alpha hydroxy acids, essential for hydration and balance.
- **Lipophilic (oil-based):** captures vitamins A, D, E and K — powerful antioxidants that nourish and strengthen.
- **Glyceric (glycerin-based):** rich in additional vitamins and antioxidant anthocyanins. The result? High-performance blends packed with active ingredients, designed to deliver visible results.

Macerates, obtained through the slow infusion of flowers, leaves and roots, gradually release bioavailable compounds that protect and regenerate the hair fiber. **Medicinal waters, full of trace elements,** complete the synergy by infusing the formula with energy, purity and harmony. With UNA, every formula becomes a perfect fusion of cosmetic science and phytotherapy — where each drop delivers true performance and well-being.

A lifeforce for every scalp and hair type.

UNA was born from an inclusive vision: to bring wellness and beauty to all hair types, regardless of origin, shape, or texture. Each formula is carefully developed to respect and enhance the hair's natural structure — whether European, Asian, Afro, or Middle Eastern. UNA embraces hair diversity as a true expression of identity and authentic beauty. Thanks to **advanced cosmetic research** and naturally derived ingredients, the line provides a **complete and tailored solution for every hair need**, everywhere in the world.
